Shell eggs are sourced from legal EU approved farms. All of our other egg raw materials are sourced from approved sites and every site and their products must comply to the following legal requirements.

The eggs comply with the directives and regulations of the European Union, such as the following Regulations [No. 589/2008](#) in regard to marketing standards for eggs, [No. 853/2004](#) of the European Parliament and of the Council laying down specific hygiene rules for food of animal origin, [No. 178/2002](#) of the European Parliament and of the Council laying down the general principles and requirements of food law, establishing the European Food Safety Authority and laying down procedures in matters of food safety and [Directive 1999/74/EC](#) laying down minimum standards for the protection of laying hens

All of our approved suppliers have an agreed raw material specification. Our shell eggs for production are Grade A eggs in accordance with Article 2 [COMMISSION REGULATION \(EC\) No 589/2008](#). Every incoming delivery is inter alia checked visually for obvious deficiencies (e.g. cleanness, damaging) and with regard to the European legislation. Damaged or dirty eggs, which do not correspond to Grade A, are sorted out. For production the shell eggs are broken automatically with a [Opti breaker by SANOVO Technology](#). During the breaking process every separated egg yolk in the separation cups is optically scanned for purity. If there are any impurities (e.g. blood spots), the egg yolk will be withdrawn.

OVODAN EGG GROUP hereby confirms that all products produced by Ovodan Egg Group are products under respect of the Halal requirements by best of our knowledge.
