

PASTEURIZATION / HEAT TREATMENT

TO WHOM IT MAY CONCERN

Regarding Pasteurization / Heat Treatment:

We hereby confirm that products manufactured at OVODAN Eiprodukte GmbH and OVODAN Foods A/S have had a Pasteurization / Heat Treatment according to the requirements set up by the European legislation as well as the requirements of USDA and OIE as seen below.

OVODAN Eiprodukte GmbH & Co. KG is an EU approved (DE-NI 11001-EG) site for egg products.

OVODAN Foods A/S are authorized by the Veterinary and Foods administration to produce Pasteurized Egg Products under the License number DK – P20 – EC

All egg powders manufactured are produced from pasteurized egg raw materials. The pasteurization equipment is regularly inspected and checked by the competent authority.

Pasteurized products from OVODAN Europe are as a minimum following the Legislation in EU as well as the Minimum demands set up by United States Department of Agriculture:

http://www.aeb.org/images/Pasteurization_Manual.pdf and the USDA demands can be downloaded here: <http://www.gpo.gov/fdsys/pkg/CFR-2014-title9-vol2/pdf/CFR-2014-title9-vol2-sec590-570.pdf>

Also, The World Organization for Animal Health (OIE), have set up guidelines for Heat treatment demands also to protect against the Highly Pathogenic Viruses from Avian Influenza.

These guidelines for Egg Products can be found following below link, and then jump to Article 10.4.25 for egg Products, and they are also in line with that Pasteurization done from OVODAN Europe products: https://www.woah.org/fileadmin/Home/eng/Health_standards/tahc/2018/en_chapitre_avian_influenza_viruses.htm

Furthermore, The World Organization for Animal Health (OIE), have set up guidelines for Heat treatment demands also to protect against Newcastle Disease.

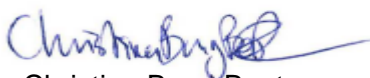

See: www.woah.org/fileadmin/Home/eng/Health_standards/tahc/current/chapitre_nd.pdf

With the supply of raw material, we have today, this is not relevant, but in case of an ND-Outbreak, we shall also apply to the requirements in the Appendix XXVIII section 2 from Regulation (EU) 2020/692.

The products are suitable for foodstuffs and comply with the requirements of national and EU regulations at any time.

For further information, please do not hesitate to contact us.
